

Gnostic Astrology – Pisces

<http://www.GnosticStudies.org/GnosticAstrology>

Planetary Influences, the Earth and its Mantram

All the Planets are similar to living beings with Body, Soul and Spirit, and have (as a consequence) their Double or Divine Angel just as we humans do. The Earth is, therefore, not an exception and also has (as a living being) her Superior Being or Angel. The current that emanates from her is Magnetism. Thus, if we want to obtain results in the Rosicrucian practices, then we must put ourselves into contact with some part of this entity.

We know that, in the Hermetic Sciences, each Planet has its name, its mantram, and its sign, which are those that are recorded upon Amulets. The mantram, the key to connecting with our Earth, is JEHOVA, who is the soul in astral corresponding to Christ. Krumm-Heller says that JEHOVA represents (in its essence) the five vowels IEQUA. In these vowels, he says, reside all the hidden strength which harmonically resonates on Earth and this would also happen in our organism if we had preserved ourselves in the primitive paradisiacal state.

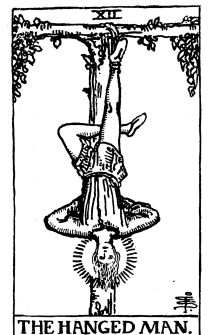

But just as we lost our purity through sin, we have also lost this faculty, and it must be recovered in order to achieve the power of the primitive Angel-Men, whose Key resides in Pisces... As a symbol, the Fish was always the Guardian of the Spirit. A Fish was also the symbol that was put on the Buddha Statues and on the Effigies of the Nazarene. The Planet of the Constellation of Pisces is Jupiter, the Personality, the Being. Thus, the Being Astrologically resides in the Fish. Pisces has two Planets, and like the Earth with Jehova and Christ, it also has two representative Angels. Back in the times of Babylonia, God the Father had the figure of a Fish, and the Greeks (in their Mysteries) said that **the Mantram of the Earth** was Oannes, Johannes, Joan, **IAO**. The element of the Fish is water, the amniotic liquid where the human fetus swims during 9 months, which is the era of Johannes, that time of going through the desert before the arrival of the Messiah. In the maternal womb, the being receives its first impressions, and at the moment of birth, all the Planets are engraved upon it, which the astrologer then decodes.

Pisces, the Cosmic Current, the Hanged Man and

In describing the passage of the cosmic currents, we described the body as being full of screens or filters that these cosmic currents have to pass through in each region (in one sense or another) until they concur in the heart for the first time and with all the energy in contact with Earth. We are, therefore, upright beings and not quadrupeds like the animals which live on four paws. The human being is, instead, erect and in this vertical position will also receive his current, and **his main purpose is to negotiate the steps in order to obtain his own redemption.**

The Sign of Pisces, symbolized by Fish, are two semicircles united with a tie or dash. These are the Earth and the Cosmos united. Between the Earth and the Cosmos one finds Arcanum 12 of the Kabbalah: the figure of a man with a halo of gold, suspended by one foot, at the end of a tree in such a way that it forms an inverted figure. It is called "Sacrifice" or "The Hanged Man". It represents the Divine Manifestation or the Revealed Law, and (according to the Kabbalists) it is the key to all Initiation. The Letter is Lamed ל in the Kabbalah, and it corresponds to the sphere of Saturn. Now let us remember when we said Saturn was the finite, and that Uranus was the infinite, and we will thereby explain why the Kabbalists connect Saturn, Lamed ל and the Fish.

The Zodiac is round and, because of this, the beginning and the end are united: Pisces & Aries, Winter & Spring, death & birth, the 12th House of Astrology with the 1st House. The Logos, the Word (according to Saint John) is the origin of all things, it is life itself. In the beginning was the Verb and only with its use can we obtain Initiation, but **the Living Verb, the Logos within us**, which is what unites us with the Logos, the Verb of the Earth. When this Mantram (IAO) was pronounced in the Temple of Jerusalem, they sounded the drums so that no one would hear. Today the veil has been lifted and we know that it is JEHOVA, whose Secret Key lies in its Five Vowels IEIOUA.

The Being, the Cosmic Verb, resides in the Head and is pronounced by utilizing the throat. In contrast, the Verb, **the Logos of the Earth, resides in the Feet** and you have to learn to derive the voice from the Feet in order to sense the vibration in them, that is to say, we must speak with the Feet. Whosoever does not know our studies will be smiling when they read this phrase of "speaking with the Feet", but we know that all Initiations do so.

The Washing of the Feet was an Initiatic Ceremony, and one never goes to a Mohammedan Mosque without having gone through it. Jesus washed the Feet of his Apostles, saying to them: "If you wash the Feet you shall be clean and prepared in the whole body and you will be able to communicate with me." (see John 13:1-17)

The Alphabet is made of vowels and consonants, whose signs all have a direct relationship with our organism and for each one there is a corresponding Initiatory movement. The primitive letters were the Runes, and in Nordic Initiatic Schools students learned those gymnastics or Runic movements that we are going to teach next. However, there is already a way for us to act upon ourselves through the movement in which one has accessed while passing through that screen or filter which astrally resides in the Feet.

Krumm-Heller's Practice to Gather the Energy of Pisces

We know that we are composed of Cells; that they in their turn are composed of molecules, these are composed of atoms, and these atoms are a conjunction of Matter, Energy and Consciousness. The result, therefore, is that these three conditions are in a constant struggle, then, Matter wants to be Energy and Energy would like to become Consciousness. **The objective of our life is to make all Matter Conscious and the Mystery of Redemption consists entirely of this objective.** But the atoms that are active in the Heart with its constant rhythmic movement are more energetically conscious than the others, and the atoms that make up our Brain are even more conscious, and in this there exists a disharmony.

We are an organic whole from the Feet to the Head, and it is necessary to carry the conscious impulse to the extremities, to the feet, so that their atoms have the necessary consciousness, and then we will be Gods like in primeval times. **In this resides the whole secret, by acting on the atoms in order to awaken the Body-Temple where God resides.**

The Disciple will sit comfortably, and (after making a mental Prayer) one should lead the Vowels to the Feet, that is to say, think and pronounce the vowel "Iiiiiiii" extending, vibrating, and seeking to mentally lead its pronunciation downwards, through the knees to the feet, and continue slowly with the other vowels just like that. The effect, more or less immediate, according to the temperament of the Disciple, is positive and sanctifies us. Each time you only have to do this, whether you are walking or you are seated, simply do this exercise mentally and you will do yourself an immense favor. **With an hour of vocalization, one achieves the filling of oneself with the divine forces that would not otherwise get in.** With this practice, we finish the first Initiatic Course.
