The Speed of the Centers and their corresponding Hydrogens

The Centers of the human machine work with different 'hydrogens'. This constitutes their chief difference. The Center working with a coarser, heavier, denser Hydrogen works slower. The Center working with light, more mobile 'hydrogen' works quicker. If we consider the work of the human machine from the point of view of the Hydrogen that allows the Centers to work properly, then we shall see why the higher Centers cannot be connected with the lower ones.

The Thinking or Intellectual Center is the slowest of all the Centers and works with Hydrogen 48. The Emotional, Moving and Instinctive Centers work with Hydrogen 24. Hydrogen 24 is many times quicker and more mobile than Hydrogen 48. The Superior Emotional Center works with Hydrogen 12, and the Superior Thinking Center works with Hydrogen 6. If the Emotional Center were to work with Hydrogen 12, then its work would be connected with the work of the Superior Emotional Center and the human being would experience new emotions, new impressions entirely unknown to them before. Something similar may also be said for the Superior Intellectual Center.

This present teaching differs from many others by the fact that it affirms that the higher Centers exist in the human being and are fully developed. It is *the lower Centers that are undeveloped or wrongly developed*. In order to regulate and accelerate the work of the lower Centers, the primary object must consist in freeing each Center from work foreign and unnatural to it, and in bringing it back to its own work which it can do better than any other Center. A great deal of energy is also spent on work which is completely unnecessary and harmful in every respect, such as on the activity of unpleasant emotions, on the expression of unpleasant sensations, on worry, on restlessness, on haste, and on a whole series of automatic actions which are completely useless.

In order to regulate and balance the work of the Centers, it is necessary to learn to economize the energy produced by our organism, not to waste this energy on unnecessary functions, and to save it for that activity which will gradually connect the lower Centers with the higher. Therefore it is critical to understand the idea of the complete materiality of all the psychic, intellectual, emotional, volitional, and other inner processes, including the most exalted poetic inspirations, religious ecstasies, and mystical revelations. **The materiality of processes means their dependence upon the quality of the material or substance used by them.**

Name of Center	Speed of Center	Comparative Speed	Correct Type of Hydrogen used as Fuel	The same Hydrogen can also be used as Nourishment for
Superior Intellectual	30,000 ³	4 (fastest of all the centers)	Hydrogen-6	the Solar Causal Body
Superior Emotional	30,000 ²	3	Hydrogen-12	the Solar Mental Body
Intellectual	1	1 (slowest)	Hydrogen-48	the Physical Body and for the Ego (as Impressions)
Emotional	30,000	2	Hydrogen-24	the Solar Astral Body
Movement	30,000	2	Hydrogen-24	the Solar Astral Body
Instinctive	30,000	2	Hydrogen-24	the Solar Astral Body
Sexual	30,000 ²	3 (fastest of the inferior centers)	Hydrogen-12 (SI)	the Solar Mental Body

The Power to Liberate or to Enslave

There is no doubt that the Center of Gravity of all human activities is in sex. The mechanicity of sex is frightening and the Intellectual Animal does not want to comprehend this. When we become conscious about sex and its functions, when we work with the Sahaja Maithuna (Sexual Magic), then this mechanicity disappears and we enter the path of Sexual Regeneration. **Sex has the great power to enslave and the great power to totally liberate.** The Internal Angel must be born from sex and we can only achieve this with the Maithuna. The wonderful Hydrogen SI-12 is the material with which sex works and creates. It is both seed and fruit. It is the seed within which the Internal Angel is found in a latent state. We have already explained that with the Transmutation of the Hydrogen SI-12 we can create the Solar Astral, Mental and Causal Bodies. Consequently, no abuser of sex can create the Superior Existential Bodies of the Being and, for them, the unhappiness continues after death with the Lunar Vehicles. It is impossible for anyone to be free from the 48 laws if they only possess Lunar Bodies. Only by creating the Solar Bodies can we liberate ourselves from the 48, 24 and 12 laws.

The Wrong or Incorrect Working of the Centers and the Abuse of Sex

The incorrect functioning of the Centers, is a theme that has to be studied during the entire life through the observation of oneself and the rigorous examination of dreams. It is not possible to comprehend the Centers and their correct or incorrect work in just a moment; we need infinite patience. One's entire life unfolds in the functioning of the Centers and it is controlled by them. Our thoughts, feelings, hopes, fears, loves, hatreds, actions, sensations, pleasures, frustrations, etc., are in the Centers...

Each Center of the Human Machine must operate with its own energy, but unfortunately the other Centers of the machine steal the sexual energy. When the Intellectual, Emotional, Movement and Instinctive Centers steal the sexual energy, then we have Sexual Abuse. What is most serious, regarding all of this, is that in order to work, the Sex Center has to simultaneously steal the energy from the other Centers, and all this is *also* Sexual Abuse. When the Sexual Center works with its own Hydrogen, then it transmutes in order to create the Solar Bodies. **Unfortunately, people abuse the sexual energy and are captivated with disorder and with wasting the Hydrogen SI-12.** It's easy to discover Sexual Abuse in people: then the Intellect, Emotional, Movement, and Instinctive Centers have: a certain special "Taste" or "Flavor", a certain unmistakable tint, a certain passion, a certain intensity that leaves no room for any doubt. When this occurs, the Sexual Center is then forced to work with heavier Hydrogens which correspond to the other Centers. It is forced to work with Hydrogens like 48, 24, etc., and then it is impossible to create the Superior Existential Bodies of the Being.

When the Emotional Center steals the sexual energy, then stupid sentimentalities, jealousy, cruelty, etc., follow. When the Moving Center works with the energy stolen from the Sexual Center, then we have the abusers of the Center of Movement such as the football players, the acrobats of the circus, cyclists of the great races, etc. When the Center of Instinct steals the sexual energy then there is a wastage through instinctive, passionate, violent acts. The Abuse of Sex truly ends when we establish within ourselves the Permanent Center of Gravity. Then the Sexual Center works with its proper Hydrogen and each Center starts working with the energy which correspond to it. In order to do this, we must annihilate the "I", reducing it to dust. It is urgent to establish a complete equilibrium of all five Centers of the Human Machine and this is only possible by dissolving the "I". **The five cylinders of the human machine provide the origin and strength for the legions of small "I's" which in their conjunction constitute what is called the Ego, the "I", the Myself.** The Pluralized "I" awkwardly wastes the Essence (which is within us in order to create Soul). When we dissolve the "I", then the squanderer of energy is finished, and the Essence begins to accumulate within ourselves, converting itself into a Permanent Center of Gravity (Soul).
